# What is Leadono?

Leadono is software that helps you all the things you need to run your online business. It helps you build autobuild subscribers list from social platforms users and from Apple & cream-of-the-top Amazon buyers. It is a groundbreaking Smart LDO technology finally allows you to effortlessly capture verified emails with just a touch or click & grow your list virally on autopilot.

# Features and Benefit

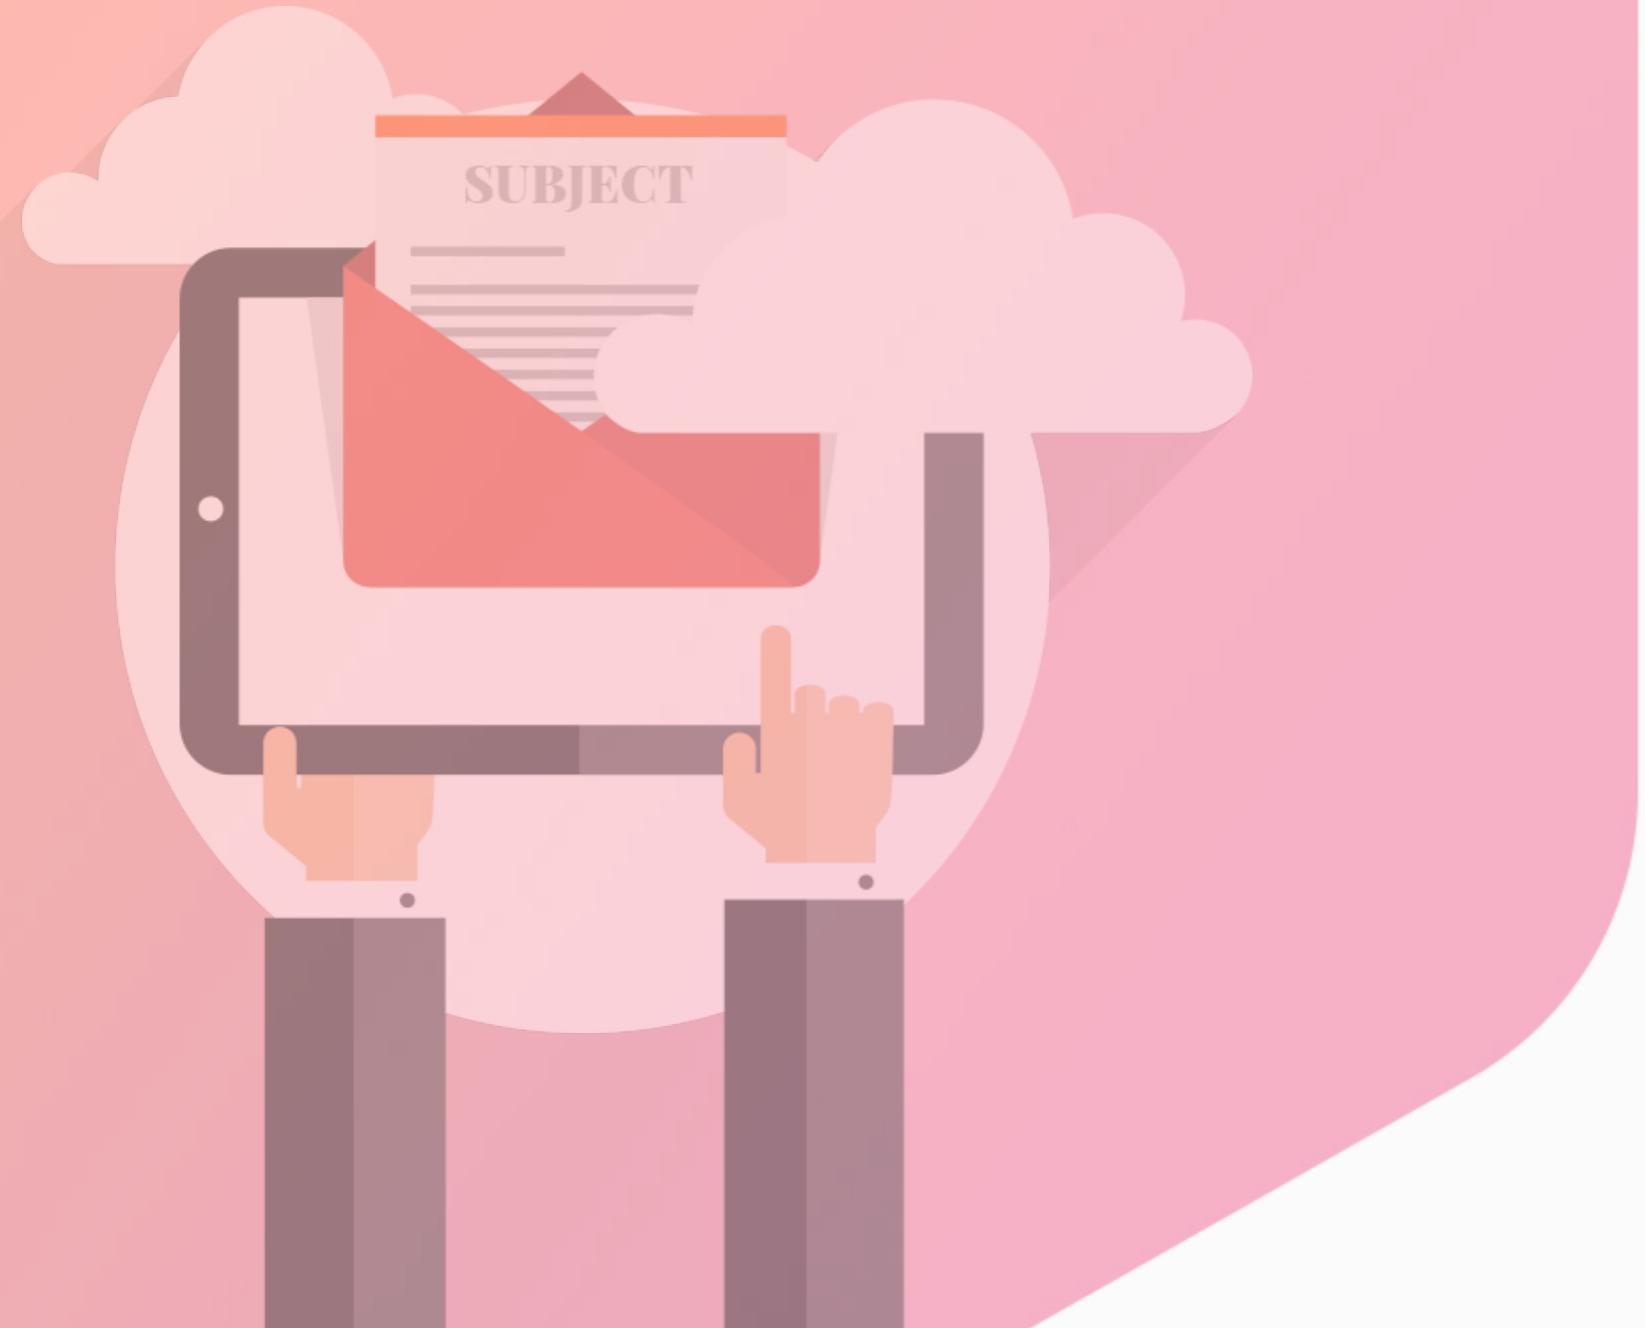

Autoresponder: There were many autoresponders apps released recently on our market, but most of the people's accounts are empty.

Email campaigns: Leadono will help people to fill those accounts with email so they can finally use them to promote.

Fast sales: Sales copy is great, and the funnel is very strong and congruent with up to \$378 commission per referred customer.

Build subscriber lists: You will be able to auto build subscribers list even without a website, and easily capture people's emails.

Synced subscribers to autoresponder accounts: All the emails of people collected will be already verified and automatically synced to your autoresponder account.

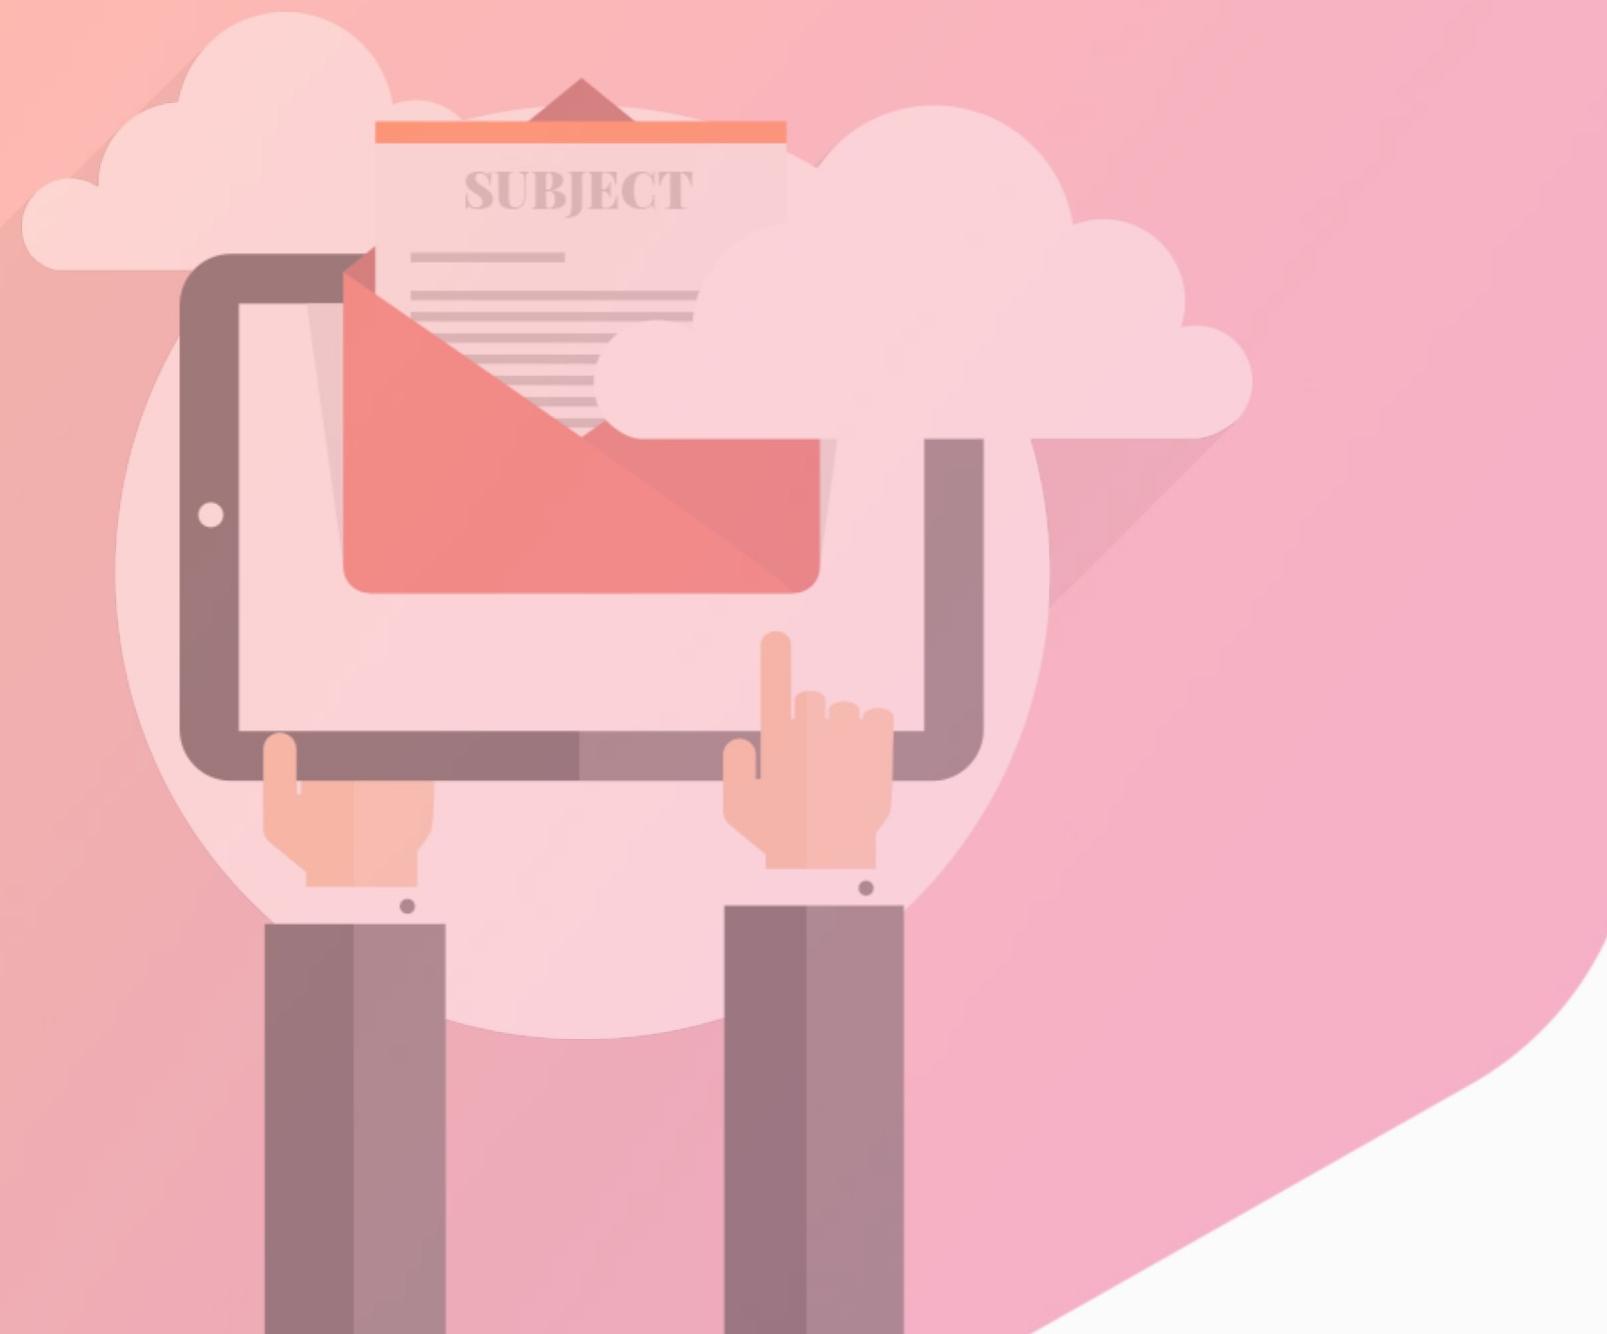

Free traffic: On top of that, you will also get direct access to the most powerful free traffic source on the internet – incentivised referral traffic system.

Risk prevent: Leadono's LDO technology is also solving the biggest problem everyone doing business on the internet has, which is enabling people to collect subscribers from mobile traffic, significantly boosting your list growth from desktop visitors, and protecting people from fake, mistyped, and throw away email addresses.

Leadono is designed to enable every visitor to push their verified email to list with a touch or click, and without typing anything, which will finally help you collect leads easily.

Leadono is a cloud-based software, which harnesses the power of the fact that most visitors are already logged in to one or more social platforms, Apple, or Amazon accounts.

Social campaigns: You will be able to collect emails with a touch or click from Facebook, Twitter, LinkedIn, Gmail, Yahoo, Microsoft, Apple, and the biggest ecommerce company on the planet – Amazon.

After people touch or click on the continue button, their verified email is pushed from the platform they use to Leadono user account, and then synced to your autoresponder.

Leadono natively supports a large number of autoresponders with direct integrations, as well as Zapier to integrate with almost any autoresponder you want.

It even gives you the ability to use html form integration to connect to obscure or custom autoresponders.

On top of that, you can also download a file with all their subscribers at any time, and upload it to an autoresponder of your choice.

# How does it work?

There are only literally 3 steps to earn such benefits from Leadono:

Step 1: Get the product in the fastest way and login

Step 2: Create campaigns in less than 1 minute

Step 3: sit back and enjoy traffic.
